

The ASWWU recognizes that the state of Washington ought to provide environmental protections that encompass all pillars of social and environmental sustainability to ensure the healthy and safe future of the residents of Washington State. It is imperative that Washington State act now in regard to climate justice. Our three main goals are to decrease pollution from the transportation sector, limit the amount of single use plastic bags, and strengthen regulations for farm labor contractors.

#### Low Carbon Fuel Standard

- Urge senators to pass SB 5412 to create low carbon fuel standard in Washington State.

#### Plastic Bag Ban

- Advocate for statewide ban on single use plastics through the passage of SB 5323 and HB 1204.

#### Farmworker Protections

- Support SB-6261 which Strengthens the Washington State farm labor contractor system by prohibiting retaliation, establishing liability for related violations, and removing an exemption that allows farm labor contractors to be non-profits.
